

COMMUNITY

The International Bank of Chicago has been quietly hard at work for more than 30 years supporting the communities we serve. Our dedicated and loyal staff give attention to our customer needs which in turn helps our communities thrive. We are close to \$1 billion in total assets and a growing profitable bank with a strong capital position.

We are a Certified Development Financial Institution (“CDFI”) and a Minority Owned Institutional (“MDI”) dedicated to serving the newly immigrated, small business owners and supporting community development. As a CDFI the majority of lending efforts serve primarily low and moderate income clients.

We focus our efforts on helping our customers. This includes helping immigrants open their first deposit account, provide credit counseling, open their first loan so they can develop a credit history and credit score and assist 1st time home buyers purchase a home. We also help our small business customers, 1-4 investment loans, multifamily loans and developers and builders with community development loans though out Chicago and the suburbs. We provide the bread and butter loans that support the businesses in the neighborhoods like the neighborhood grocery stores and bakeries, the gas station, & C stores, the nail salons and the countless restaurants that make our cities great.

We are proud to service our customers and take great pride in their success.
